## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 4-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4-5 and 10, it is unclear how the power supply source" is interrelated and associated with the transceiver unit, signal processing means and the second radio antenna.

In claim 10, it is unclear whether the transceiver unit is capable to receive retransmitted signals from the sensor units from a three phase distribution bay.

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

2. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is unclear from the specification whether the second antenna simultaneously receives the retransmitted signals from the first antennas of the sensor units when the sensor units are used in three phase distribution bay. If it does, how can the processing means recognize which sensor units provide those signals in order for the processing means to analyze the detected signals properly for each sensor unit.

Art Unit: 2829

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features of "processing means" as recited in claims 4-5 and 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. Since claims are indefinite. No art has been applied to these instant claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Litton (Pat # 5,446,452) discloses temperature monitoring system.
